

SPECIFICATION SHEET

Name of Product : **RINGO HONEY COMB**

Specification	: 100% Rubber
Manufacturing Method	: Rubber Molding in heavy hydraulic press under high temperature
Colour	: Black
Type	: Solid with Drainage Holes
Compound	: NR
Hardness (Shore A)	: 50° +/- 5°
Density (SG)	: 1.25
Min. Temperature	: -30
Tensile Strength MPa	: 4
Properties	: Anti-slip
Thickness	: 22mm
Sizes	: 50x80 cm, 80x120 cm
Tolerance Limit	: +/- 5% on general values
Applications	: Shall be used for a multitude of Leisure, Agriculture, Industrial, Retail and Domestic applications which include playground areas, wet area ground stabilization, wet area machine and person station areas, wet processing plants and door entrances
Features	: Excellent drainage properties, High ground stabilization Good anti-fatigue characteristics, High impact resistance, Anti-slip finish, Low Maintenance.
Packing	: Bale Packing or Palletized
Cleaning	: Sweep, Vacuum or Mop
Storage Instructions	: Keep well wrapped in a dry place to avoid fungal infections, Store with dry silica gel, if infected with Fungus clean with Silicon.
